UI/UX DESIGN INTERNSHIP

From Wireframes to Interactive Prototypes • Full UX Case Study

3 Levels

3 Tasks

Figma + XD

Virtual Internship • Verified Certificate • Practical Skills. Real Impact.

Quantifyz Technologies

UI/UX Design Internship Program

Program Overview

Design exceptional mobile experiences — from low-fidelity wireframes to polished high-fidelity UIs and interactive prototypes backed by real user research.

Level 1 Foundation

Task 1: Mobile App Wireframe Design

- User Flow Diagram
- 5 Low-Fi Wireframes
- Design Documentation

Level 2 Intermediate

Task 1: High-Fidelity UI Design

- Complete UI Design
- Design System
- Component Library

Level 3 Advanced

Task 1: Interactive Prototype & UX Case Study

- Interactive Prototype
- UX Case Study
- Usability Report

LEVEL 1

Foundation Task

Create user flows and low-fidelity wireframes for a mobile application

01

Choose Your Application Domain

Food Delivery

E-Commerce

Fitness

Education

Requirements

- Select a mobile app domain
- Create User Flow diagram
- Design Splash Screen (Lo-Fi)
- Design Login Page (Lo-Fi)
- Design Home Page (Lo-Fi)
- Design Product/Service Page (Lo-Fi)
- Design Profile Page (Lo-Fi)
- Follow basic UI principles & grayscale

✂ Figma • Adobe XD • Grayscale Only

Wireframe Screens

Splash Screen

Login Page

Home Page

Product / Service Page

Profile Page

Expected Output

- User Flow Diagram
- 5 Low-Fidelity Wireframes
- Design Documentation

LEVEL 2

Intermediate Task

Transform wireframes into polished, high-fidelity UI designs with a complete design system

Design System Components

Colors

Typography

Buttons

Icons

Screens to Design

Login Screen

Dashboard

Product Listing

Product Details

Checkout Page

Requirements

- Convert wireframes to hi-fidelity designs
- Create Design System:
Colors, Typography, Buttons, Icons
- Design Login Screen
- Design Dashboard
- Design Product Listing Page
- Design Product Details Page
- Design Checkout Page
- Ensure responsive design principles

✂ Figma • Adobe XD

Expected Output

Complete UI Design

5 polished, pixel-perfect screens

Design System

Colors, type scale, buttons & icons

Component Library

Reusable, responsive components

LEVEL 3

Advanced Task

Interactive prototype, real user testing & a comprehensive UX case study

UX Case Study Deliverables

Problem Statement

User Research

User Persona

User Journey Map

Wireframes

Final UI Screens

Usability Findings

Design Improvements

Prototype Requirements

- Create clickable prototype
- Implement screen navigation
- Design micro-interactions
- Usability testing ≥ 5 users

UX Case Study Includes

- Problem Statement
- User Research & User Persona
- User Journey Map
- Wireframes → Final UI Screens
- Usability Findings & Design Improvements

Expected Output

Interactive Prototype

Clickable Figma/XD prototype with nav

UX Case Study

Full research & design documentation

Usability Testing Report

Findings from ≥ 5 users + improvements

End-to-End UX Design Journey

1

Research

User interviews,
surveys & analysis

2

Define

Persona, journey map
& problem statement

3

Ideate

User flow, sketches
& information arch.

4

Wireframe

Lo-fi grayscale
screen layouts

5

UI Design

Hi-fi design system
& polished screens

6

Prototype & Test

Clickable prototype
& 5-user testing

Deliverables across all levels: User Flow • Lo-Fi Wireframes • Design System • Hi-Fi UI • Prototype • UX Case Study • Usability Report

Quantifyz Technologies

Learn. Gain Knowledge. Get Certified.

Final Deliverables

User Flow Diagram

Visual navigation map

Lo-Fi Wireframes

5 grayscale screens

**Hi-Fi UI + Design
System**

Full visual identity

Interactive Prototype

Clickable Figma/XD

UX Case Study

Full research doc

Complete any 2 of 3 Levels to earn your Verified Certificate!
